

CE514 –Data Mining

Saturday, November 18, 2017 3:27 PM

KADİR HAS UNIVERSITY

CE514 –Data Mining and Data Warehousing

Project Subject:

- Each student will study on different datasets in this project. In the preprocessing part of the study, you should analyze the data set and apply feature selection methods to select distinguishing features. In data mining part, you should apply three different classification and three different clustering methods and compare your results to decide the best method.
- At the end of study, each student will write a project report (**due to 15th Dec**) and prepare a Power Point Presentation to present at class within 10 minutes (**15th Dec and 22th Dec**)

Internet Link for Data Sets: <http://archive.ics.uci.edu/ml/>

No	Subject	Name	Surname
1	Abalone		
2	Primary Tumor Data Set		
3	Breast cancer winconsin(orginal)		
4	Car Evaluation Dataset	Abdullah Enes	SARI
5	Congressional Voting Records Dataset		
6	Dermatology		
7	Wine		
8	Echocardiogram		
9	Echoli Dataset		
10	Glass Identification		
11	Haberman's Survival		
12	Hayes-Roth Data Set		
13	Heart Disease		
14	Hepatitis		
15	Liver Disorders Dataset		
16	Lung Cancer Data Set		
17	Magic Gamma Telescope Data Set		
18	Mammographic Mass		
19	Mushroom		
20	Thyroid Dataset		
21	Flags		
22	Forest Fire
